

Grooves

When words fail us, we can always rely on dance to express exactly what we feel.

Dance on a virtual platform has been one of the most interesting developments we have witnessed during the pandemic. When the sound of feet tapping on the stage suddenly stops, there's a silence. Grooves filled that void on a virtual stage.

Our Inter-school fest is dedicated solely to dance, for classes VIII to XII. This fest was focused on various diverse dance forms and allowed for inspiration to be drawn from unimaginable concepts. Grooves brought to the forefront different ways of dancing that emphasize creativity, movement and spontaneity rather than traditional choreography.

The mixed-bag of events combines the element of dance and rhythm with art, science, history and sociology, among other concepts, making each performance unique. Paradigm, Two Step, Juxtaposition, Affinity, Charitra and Cool-off were aimed at celebrating creative interpretation, rhythm, confidence and the integration of dance with myriad different fields such as Science, History and Art. Not only did it allow for experimentation but also for participants to explore different aspects of dance, presenting something new.

In these unprecedented times, Grooves brought a sense of joy and expression to every dancer. It was an absolutely exhilarating weekend of inspiration through every move!
